

THE
MERCURY
SERIES

THE MERCURY SERIES

The AGA Mercury range is the modern-day incarnation of the iconic 19th century AGA. This collection culminates the finest attributes of world-class cooking.

Each model's aesthetic detailing is divine in its own right and features multiple heat-efficient ovens, dynamic multifunction cooking control and adjustable racking systems.

Designed and built in the UK, this range is a technical masterpiece, the embodiment of exquisite quality and stylish, thoughtful design.

Available in two sizes and in a full palette of sixteen colour options representing a wide and exciting spectrum of sophisticated design expression, from modern contemporary to British traditional. These colors give homeowners and designers alike a full range of tones never before available within this family of AGA ranges.

The Mercury cooking versatility continues with the availability of an all-electric model featuring an induction cooktop or dual fuel model which features a gas cooktop.

The AGA Mercury range is the perfect match for any mood or lifestyle.

COLOUR AND DESIGN COLLECTIONS

Colour can be used to energize a space, or relax an entire atmosphere. It can express our personalities, and assist in setting the perfect mood for the art of creativity in the foods we prepare. Colour can remind us of places we've been, feelings we've shared, and moments captured forever in our memories.

AGA has added five new bold hues to its existing Classic Colour Collection, as well as unveiling the new Soho Colour & Design Series, consisting of a stainless steel fascia and eight expressive shades inspired by the vibrant London arts district in which the collection takes its name.

The full palette of sixteen colour options represent a wide and exciting spectrum of design expression accompaniment, from modern contemporary to British traditional. Stunning reds, deep and expressive blues, classic racing greens, soft and comforting grays and neutrals... these colours give homeowners and designers alike a full range of tones never before available within this family of AGA ranges.

The new Soho Colour & Design Series is as varied as the inhabitants, entertainments and architecture of the District itself. Whether inspired by a bright doorway hidden in Ferrier's Passage, sparkling autumn foliage hanging high above Kingly Square, a freshly painted Carnaby Street storefront, or the bustle and energy that is Cambridge Circus, the Soho Series perfectly emulates the mood & scene of these London streets.

We invite you to express yourself.

Blanket your range in a shade befitting of your unique personality.

SERIES

THE AGA INDUCTION COOKTOP — GUARANTEED TO
INDUCE ENVY

Fast, responsive and incredibly controllable, the induction cooktop option on an AGA range offers the following benefits:

ENERGY EFFICIENCY

Powered by electromagnetism, induction technology heats only the pan and its contents, providing up to 90% efficiency.

FAST AND RESPONSIVE

It can take as little as five seconds for water to begin to boil and reducing the pan to simmering is equally as fast.

SAFE

Its surface retains minimal heat, making it safer for those with small children.

UNIFORM COOKING

Because of the ferrous material within the cookware, pans heat at the same level uniformly – eliminating hot spots, and the likeliness of burned contents.

EASY TO CLEAN

Since the surface stays cool, spills will not stick or burn onto the surface, making cleaning a simple wipe-down.

THE
MERCURY
SERIES

SEVEN VERSATILE COOKING MODES FOR CREATING
CULINARY ART

WARMING

Turn on the warming heat mode to crisp up pizza or quiche crusts or to slow-cook dishes.

BROWNING (BROIL)

Applying only top heat, this mode is perfect for crisping or toasting dishes like cheesy casseroles, baked pastas or roasted vegetables.

CONVENTIONAL

Suitable for roasting and baking pastries and cakes, this function combines top and base heat.

CONVECTION ASSISTED

Ideal for thoroughly cooking larger items or baking on multiple racks at once, the mode applies top and base heat with additional fan-assisted air circulation.

CONVECTION BROILING

This function applies top heat fanned to food, producing even, less-intense heat compared to a conventional broiler.

TRUE CONVECTION

A good “all-round” function, this mode evenly distributes fan-oven heat circulating from a heating element separate from the oven cavity.

THAW AND SERVE

Speed up defrosting and safely thaw food with unheated air circulation.
